

RICARDO PATIÑO

Full Stack Software Developer

rickpatinor@gmail.com | +506 8879 5100 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Linktree](#)

PROFILE

Full Stack Software Developer with 5+ years of experience developing and supporting web applications, customer-facing solutions, integrations, and automation initiatives. Hands-on experience with React, JavaScript, TypeScript, Python, SQL, REST APIs, HTML, and CSS, with a strong focus on application development, system integration, troubleshooting, and technical problem-solving. Experienced in developing rapid solutions, integrating APIs, automating processes, testing and debugging applications, and supporting software deployment within enterprise environments. Skilled in translating business requirements into scalable technical solutions while maintaining application functionality, performance, and reliability.

EXPERIENCE

Renewal Engineer

12/2024 – 08/2026

OCP Tech

- Managed enterprise renewal portfolios exceeding USD \$3M annually, supporting contract continuity and revenue retention.
- Increased customer retention by 30% through proactive customer engagement and structured renewal management.
- Optimized enterprise licensing strategies by aligning Cisco subscription and contract structures with customer business requirements.
- Built a web-based forecasting dashboard using Excel and Power BI, improving visibility into renewal pipelines, coverage, and forecast status.
- Streamlined Cisco renewal operations by managing Smart Accounts, CCW-R, PXP, Cisco Ready, and Enterprise Agreements across customer portfolios.

Presales Engineer

04/2024 – 12/2024

- Developed web-based software solutions using React, JavaScript, Python, SQL, and REST APIs, converting customer and business requirements into functional applications.
- Translated technical discovery findings into solution requirements, enabling the definition of practical architectures aligned with customer business challenges.
- Designed solution architectures and implementation approaches, connecting technical capabilities with customer requirements and deployment needs.
- Improved CI/CD workflows and deployment automation, increasing the efficiency and reliability of software delivery processes.
- Developed and evaluated AI, analytics, and automation use cases using Python and SAS, translating business requirements into technical solutions.
- Delivered technical demonstrations, presentations, and training sessions to enterprise audiences of 300+ participants, communicating complex technical solutions and use cases.
- Supported solution definition and implementation planning by coordinating technical requirements across Sales, Engineering, and business stakeholders.

Technical Producer

04/2022 - 09/2023

Cheetah / Marigold

- Developed and tested responsive, cross-platform web components using HTML, CSS, JavaScript, React, SQL, and Groovy, supporting multiple customer-facing campaign platforms.
- Converted technical requirements into production-ready web components, enabling customer-specific functionality across digital marketing platforms.
- Resolved application and integration issues through root-cause analysis, reducing technical blockers and coordinating escalations with L2 engineering teams.
- Tracked, triaged, and resolved software defects through Jira, supporting delivery quality and project timelines.
- Supported enterprise platforms including Messaging, CheetahMail, Distributed Marketing, EDP, Expressions, and Journey Designer, maintaining functionality across customer implementations.
- Strengthened software delivery quality through structured testing, debugging, technical documentation, and defect resolution.

Campaign Manager (Professional Practice)

10/2021 - 01/2022

Movable Ink

- Developed dynamic, production-ready web content using HTML, CSS, and JavaScript, supporting customer-facing digital experiences.
- Implemented automated QA processes and VM-based testing environments, improving validation coverage throughout the software development lifecycle.

- Resolved software defects through technical analysis, debugging, and recovery planning, maintaining application reliability during customer engagements.
- Maintained technical documentation and delivery metrics, improving visibility into project status and customer deliverables.
- Resolved technical issues by coordinating with technical and customer-facing teams, supporting reliable and timely solution delivery.

EDUCACIÓN

BSSE Software Engineer

Fidelitas University · 08/2026 – 04/2027

BSSE Software Engineer

Fidelitas University · 01/2023 – 08/2026

BBA Business Management

Universidad Latina · 01/2006 – 12/2008

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Context API, Flux, Hooks, jQuery.

Backend: Python, Flask, REST APIs, Java, PHP, Groovy.

Databases: SQL, MySQL, SQLAlchemy, NoSQL.

Cloud & DevOps: AWS, Azure, DigitalOcean, CI/CD, GitHub, Postman.

Testing & Development: Automated QA, Integration Testing, Debugging, Troubleshooting, API Testing.

Automation & Data: Python Automation, Power BI, Excel, SAS, Machine Learning.

Tools & Platforms: Jira, Salesforce, WordPress, Cisco Platforms.

Security & Networking: Web Application Security, Network Security, HTTP/TCP, DNS, Routing, VPN.

CERTIFICATIONS

- MySQL Data Base – Fidelitas University 2023.
- HTML y CSS – Fidelitas University - 2022.
- Bootstrap – Fidelitas University - 2022.
- JavaScript – Fidelitas University - 2022.
- JQuery – Fidelitas University - 2022.
- **Full Stack Web Development - 4Geeks Academy MICIT - 2021.**
- CMS Developer – WordPress – 2026.
- Renewal Manager – CISCO - 2026.
- Black Belt IA - CISCO - 2025.
- Black Belt Enterprise Agreement Partner - CISCO 2026.
- CX Champion – CISCO - 2025.
- Using Computer and Mobile Devices – 2025.
- IA Development - BIG School – 2025.
- Success Tracks - CISCO Black Belt – 2025.
- NSP Nutanix Sizing Professional – NUTANIX – 2025.
- Introduction to CISCO Sales – CISCO - 2024.
- CCNAv7 Switching, Routing, and Wireless - CISCO - 2024.
- CCNAv7: Introduction to Networks - CISCO - 2022.
- CCNAv7: Enterprise Networking, Security, Automation - CISCO - 2020.
