

RICARDO PATIÑO

Full Stack Software Developer | React · Python · JavaScript · TypeScript · REST APIs

rickpatinor@gmail.com | +506 8879 5100 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Linktree](#)

PROFILE

Full Stack Software Developer with 5+ years of experience developing and supporting web applications, customer-facing solutions, integrations, and automation initiatives. Hands-on experience with React, JavaScript, TypeScript, Python, SQL, REST APIs, HTML, and CSS, combined with strong troubleshooting and technical problem-solving skills. Experienced in translating business and customer requirements into practical technical solutions, collaborating with cross-functional teams, and improving software delivery and deployment processes. Strong background in rapid solution development, testing, debugging, documentation, and stakeholder communication within enterprise environments.

EXPERIENCE

Renewal Engineer

12/2024 – 08/2026

OCP Tech

Serve as the primary technical advisor for strategic enterprise customers, managing Cisco service agreements, software subscriptions, and lifecycle renewals while identifying opportunities to expand technology adoption and customer success.

- Managed enterprise renewal portfolios exceeding USD \$3 million annually.
- Increased customer retention by 30% through initiative-taking customer engagement.
- Worked directly with enterprise customers to align licensing strategies with business objectives.
- Built a web forecasting dashboard using Excel and Power BI.
- Managed Cisco Smart Accounts, CCW-R, PXP, Ready and Enterprise Agreements.

Presales Engineer

04/2024 – 12/2024

OCP Tech

Partnered with enterprise customers to design and present technology solutions supporting AI, analytics, automation, and digital transformation initiatives.

- Developed web-based software solutions using React, JavaScript, Python, SQL, and REST APIs to support customer and business requirements.
- Participated in technical discovery sessions to understand business challenges, gather requirements, and translate them into practical technology solutions.
- Designed solution architectures and collaborated with customers and internal teams to define implementation approaches.
- Improved CI/CD workflows and deployment automation, contributing to more efficient and reliable software delivery.
- Supported AI, analytics, and automation initiatives using Python and SAS, evaluating use cases and translating business needs into technical solutions.
- Delivered technical demonstrations, presentations, and training sessions to enterprise audiences of 300+ participants.
- Collaborated with Sales, Engineering, and business stakeholders throughout solution definition and implementation planning.

EDUCACIÓN

BSSE Software Engineer

Fidelitas University · 01/2023 – 08/2026

BBA Business Management

Universidad Latina · 01/2006 – 12/2008

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Context API, Flux, Hooks, jQuery.

Backend: Python, Flask, REST APIs, Java, PHP, Groovy.

Databases: SQL, MySQL, SQLAlchemy, NoSQL.

Cloud & DevOps: AWS, Azure, DigitalOcean, CI/CD, GitHub, Postman.

Testing & Development: Automated QA, Integration Testing, Debugging, Troubleshooting, API Testing.

Automation & Data: Python Automation, Power BI, Excel, SAS, Machine Learning.

Tools & Platforms: Jira, Salesforce, WordPress, Cisco Platforms.

Security & Networking: Web Application Security, Network Security, HTTP/TCP, DNS, Routing, VPN.

SOFT SKILLS

Analytical Thinking, Problem Solving, Teamwork, Adaptability, Leadership, Critical Thinking, Process Improvement.

CERTIFICATIONS

- MySQL Data Base – Fidelitas University 2023.
- HTML y CSS – Fidelitas University - 2022.
- Bootstrap – Fidelitas University - 2022.
- JavaScript – Fidelitas University - 2022.
- JQuery – Fidelitas University - 2022.
- Full Stack Web Development - 4Geeks Academy MICIT - 2021.**

OTHER

- CMS Developer – WordPress – 2026.
- Renewal Manager – CISCO - 2026.
- Black Belt IA - CISCO - 2025.
- Black Belt Enterprise Agreement Partner - CISCO 2026.
- CX Champion – CISCO - 2025.
- Using Computer and Mobile Devices – 2025.
- IA Development - BIG School – 2025.
- Success Tracks - CISCO Black Belt – 2025.
- NSP Nutanix Sizing Professional – NUTANIX – 2025.
- Introduction to CISCO Sales – CISCO - 2024.
- CCNAv7 Switching, Routing, and Wireless - CISCO - 2024.
- CCNAv7: Introduction to Networks - CISCO - 2022.
- CCNAv7: Enterprise Networking, Security, Automation - CISCO - 2020.
- SCRUM Fundamentals – SCRUM - 2023.
- Introduction to IoT – CISCO - 2023.
- Bach. Business Management – U Latina 2007

Technical Producer

04/2022 - 09/2023

Cheetah / Marigold

- Developed and tested responsive, cross-platform web components using HTML, CSS, JavaScript, React, SQL, and Groovy across multiple customer-facing campaign platforms.
- Translated technical requirements into production-ready web components while collaborating with business and technical stakeholders.
- Troubleshoot application and integration issues, performing root-cause analysis and coordinating escalations with L2 engineering teams.
- Tracked and triaged defects through Jira, maintaining delivery quality and resolving technical issues within project timelines.
- Supported platforms including Messaging, CheetahMail, Distributed Marketing, EDP, Expressions, and Journey Designer.
- Contributed to reliable software delivery through testing, debugging, documentation, and cross-functional collaboration.

Campaign Manager

10/2021 - 01/2022

Movable Ink

- Built dynamic, production-ready web content using HTML, CSS, and JavaScript for customer-facing digital experiences.
- Implemented automated QA processes and VM-based testing environments to validate software throughout the development lifecycle.
- Debugged software defects, analyzed technical issues, and implemented recovery plans to maintain application reliability.
- Maintained technical documentation and delivery metrics across customer engagements.
- Collaborated with technical and customer-facing teams to troubleshoot issues and ensure reliable delivery.

RELEVANT DEVELOPMENT EXPERIENCE

- 5+ years of combined experience developing, testing, troubleshooting, and supporting web-based applications and digital experiences.
- Hands-on development using React, JavaScript, TypeScript, Python, SQL, REST APIs, HTML, and CSS.
- Experience translating customer and business requirements into technical solutions and production-ready applications.
- Experience with automation, CI/CD, testing, debugging, documentation, and deployment workflows.
- Experience collaborating with business stakeholders, customers, Sales, Engineering, and technical teams.
- Experience developing solutions for marketing and customer-facing digital platforms.

PROJECTS

Portfolio: <https://ricardopatino.netlify.app>

Full Stack Developer —Hotel Villa Grace website.

<https://www.hotelvillagrace.com>

Independent project, real client

- Developed the hotel website from end to end to provide potential guests with direct access to pricing, photos, and video.

- Integrated an AI-powered live chat into the site to provide immediate responses to guest inquiries.
- Tech stack: React, TypeScript, AI chatbot — hotelvillagrace.com (WebApp) deployed on Digital Ocean App Platform.
- Also built a CMS-based version (HTML, CSS) on Wix as an alternative backup site.

La verdadera transformación digital implica claridad en tareas y responsabilidades. Con iBPM y herramientas como Moorea, es posible ordenar procesos, reducir errores y aumentar productividad sin grandes inversiones.

Automatización y teletrabajo: claves para modernizar la empresa.

Ricardo Patiño - Ciudadano news.

06/2025 [Automatización y teletrabajo: claves para modernizar la empresa.](#)

Ricardo Patiño de OCP TECH reflexiona sobre la transformación digital y la resistencia al cambio en las empresas. Muchas aún dependen de papel, Excel y procesos obsoletos pese a las ventajas del teletrabajo y la infraestructura moderna. La clave: ver la automatización como un aliado que potencia el trabajo humano, no que lo reemplaza.
